

SCHREINER  
MEMORIAL  
LIBRARY

# The Schreiner

# Shenanigan

**June 2017**

For our younger lifelong learners and their families.

## Schreiner Summer Library features STEM Programs (Science, Technology, Engineering and Math)

*By offering STEM, we ready children for school by forming the basis for understanding math and science and for higher-order thinking. STEM education creates critical thinkers, increases science literacy, and enables the next generation of innovators. When we weave literacy activities into STEM, a child is more likely to have a willingness to listen to stories, a desire to read and to be read to, have a curiosity about words and letters, and is more likely to develop an enjoyment of songs, poems, rhymes, jingles, and books. Making math, science and reading both fun and interesting motivates children to become learners for life.*
